# WHO WE ARE

---

## Sedacta offers you a total solution for industrial automation

As an integrator and machine constructor, we are assisting you with service interventions up to turnkey projects.

In terms of Motion Control, Sedacta has an extensive expertise: fast positioning combined with high accuracy! In addition, we can offer retrofits and controller upgrades for your existing machines, in accordance with today's safety standards. This often results in an optimization of your production output and machine availability.

## Ready for the future

Sedacta has references in different markets. Each time, we do our best to use our expertise to create added value for our customers by implementing the correct technology and absorbing the feedback from the field.

As experts in automation, Sedacta is active in all stages of a production process. Through integration of Industry 4.0, robotics and vision technology, we help our customers to evolve into smart factories of the future.

**MOTION**

**ENGINEERING**

**VISION**

**INDUSTRY 4.0**

**ROBOTICS**

## Wide expertise

Feeding, punching, cutting, slitting, perforation, etc.; Sedacta has a wide expertise in automating and commissioning of more than 250 Soenen machines all over the world. We developed the control system for 3D CNC punching lines used for hole punching in the chassis of trucks, cutting and slitting lines for transformer cores and perforation presses for sheet metal industry.

## Motion control

Accurate positioning, high accelerations and fast response times are our favorite playing field! This will ensure you a maximum capacity with perfect quality.

## Robotics

Pick & Place with a linear robot, manipulations with a robot arm or the integration of a Cobot in your production process.

## Valtech Group

Sedacta is a member of the Valtech Group. This is a group of 13 independent companies specialized in machine construction and project oriented business. A team of 70 engineers guarantees you a flexible and innovative solution.
