FACTS

Joined forces, stronger together.

Frank & Peter Vandeputte — owners

The Valtech Group people capital represents an invaluable knowledge and experience, and by joining forces, we can manage an even greater complexity in the total solution. The close co-operation between our companies guarantees that we can provide real added value for the customer.

100% family-owned

COMPANIES

Strong companies are the key.

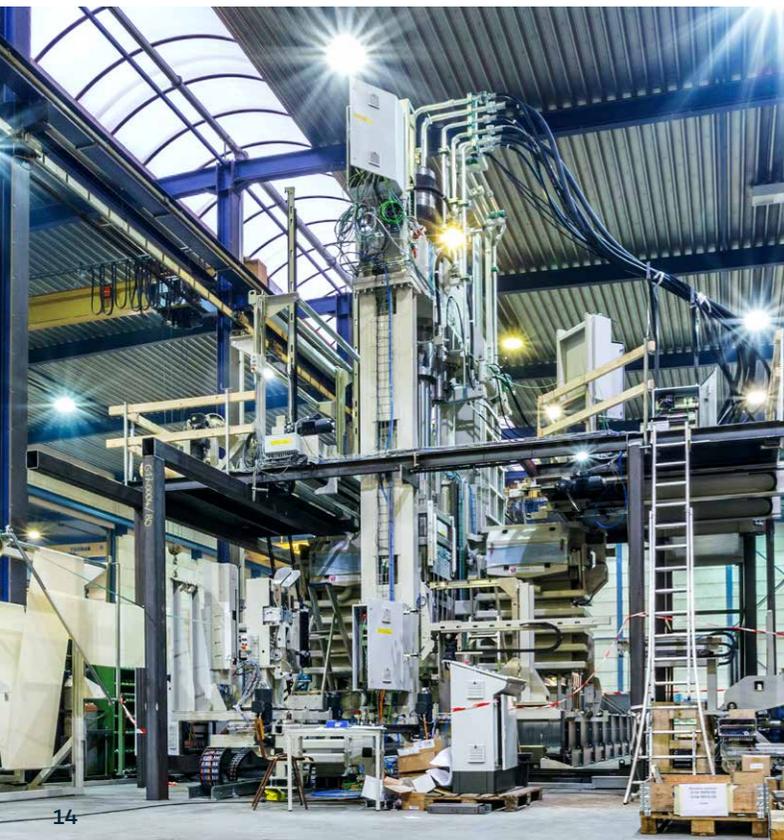

The Valtech Group companies all have a specific work area and expertise. Together, however, they stand even stronger and can offer customers total solutions for all kinds of projects.

Valvan & Gualchierani Baling Systems develop baling presses for fibers, recycling and fabric, total solutions with automatic supply, sorting systems and bale processing for used clothing, etc.

Ad Rem is an expert in the research, design and construction of machines for the recycling, mineral and vegetable processing industry. These machines rely on a wide range of different technologies.
